IN-LINE CENTRIFUGAL DUCT FAN
TSKII Series

In-Line Centrifugal Duct Fan – TSKII Series

- TSK II series are designed for direct connection in-line with standard diameter circular ducting.
- Suitable for applications in residential, commercial and industrial exhaust and supply ventilation such as bathrooms, kitchens, offices, factories, shops, bars, gymnasiums, restaurants etc.
- Complete range of inlet and outlet diameters to allow installations in most standard sizes of commercial ducts.
- The motor and impeller assembly are suitable for operation at any angle and deliver exceptional airflow performances against the high static pressures typically found in ducted ventilation systems.
- All TSK II series are manufactured from high grade corrosion resistant pressed galvanised sheet steel.
- Non-stalling backward curved impeller which is factory matched to the corresponding external rotor motor and dynamically balanced to ISO 1940 standards for vibration free operation.
- All models are supplied as standard with a remotely mounted wiring junction box to provide the installer with a completely flexible choice for positioning and installation.
- Motors of this TSK II series are fully speed controllable using electronic or auto-transformer voltage control regulators.
- Enclosed, single phase, 230V, 50/60 Hz external rotor type, motors included sealed for life ball bearing assemblies and Class B, IP44 protection with an internal automatic reset safety thermal overload protection device as standard.
- Operating temperature - 40° to +40°
